

Induced Fluorescence Detector

Key Benefits

- Ultra Sensitivity for CE and LC
- * Keep the same and ultimate sensitivity as Laser Induced Fluorescence technology
- Increase the life time and reduce the cost of replacing the light source
- P Easy to set up
- Small footprint
- On-line CE or LC-LIF-MS
- Dual emission wavelength

Our detector is commonly employed in R&D and Quality Control laboratories in pharmaceutical companies, research institutes and universities in Europe, North America and Asia.
